

# THANATHON YICHATURAT

<https://thanathonyichaturat.github.io/>

Senior Statistics student at Kasetsart University with experience in data analysis and biostatistics. Skilled in using R, Python, and Stata to analyze data and apply statistical methods such as regression models and survival analysis. Able to work with data carefully and clearly present results. Interested in biostatistics and health data research, especially in a basic understanding health-related problems and supporting data-driven decisions.

## EDUCATION

2022 - 2026

Bachelor of Science in Statistics, Kasetsart University, Thailand

GPA: 3.52

## EXPERIENCE

Statistician Internship

Faculty of Medicine, Chulalongkorn University (Apr 2025 – Jun 2025)

- Analyzed healthcare costs related to RSV treatment using statistical models
- Evaluated risk factors for severe COVID-19 outcomes among patients with comorbidities
- Presented insights from research findings to academic team

## SKILLS

Statistical Methods: Linear Regression, Logistic Regression, Survival Analysis, Negative Binomial

Programming: R, Python, Stata

Tools: Excel, Power BI

Soft Skills: Communication, Adaptability, Responsibility

## ACTIVITIES

- Head Student, Department of Statistics (2022 - 2025)
- Competitive Makathon Next Gen 2024 CP Axtra
- Project Organizer, Wai Kru Ceremony (2025)
- Survey people in Kasetsart University Fair (2025)
- Project Organizer, Power BI Workshop (2025)
- Competitive Microsoft Excel 2019 (Silver Level), ARIT (2025)

## PROJECTS

### Predicting E-Cigarette Use Among Thai Youth Using Machine Learning

- Applied machine learning models to identify behavioral and mental health risk factors
- Detected key patterns influencing e-cigarette usage

### Evaluating COVID-19 Death Trends and Regional Relative Risks

- Compare Poisson Regression and Negative Binomial Regression
- Used Negative Binomial Regression to analyze mortality trends
- Identified regional disparities in death rates

### Factors Affecting CD4 Follow-up in Northeastern Thailand

- Applied regression and survival analysis techniques
- Identified significant factors affecting patient follow-up

### CU buddy 2026

- Detected key patterns influencing non-condom usage

## LANGUAGES

Thai (Native)

English (TOEIC 635)

Chinese (Intermediate)

## CAREER INTERESTS

Biostatistician

Statistician (Medical / Public Health Field)

Data Analysis

Data Scientist
